All-Around Fun and Fitness

Gymnastics is truly the most diversified of all the sports activities because it involves many different types of exercise that work all of the muscles of the body.

These exercises were designed to develop strength and coordination. As a result, the skills and techniques learned through gymnastic activities will help you in other sports. You'll find that there is a strong relationship between gymnastics and diving, track and field, football, and many other sports.

Gymnastics builds body and character. It will strengthen your self-discipline and raise your self-esteem. But most important, gymnastics is fun.

It is important to listen and follow your coach's instructions and directions. Doing so will help keep you safe and help prevent injuries.
